The Digital Divide!

Internet is not always affordable.

Internet infrastructure is not always available.

Existing Internet infrastructure is not used to its potential.

Commercial internet providers

fail to provide affordable access.
construct widespread infrastructure.
are profit driven.

The Problem.

Yes we can!

Build our own infrastructure.
Share it.
Bridge the digital divide.

Community networks.

Sharing.
Collaborating.
Contributing.

Better world.

The goal.

Empower individuals.
Encourage local cooperation.
Aim for global connectivity.

Better world.
